Applicant: Reuben E. DeLoach

Number: 10 / 813384

RPA Filed: March 30, 2004 (Express mail)

RPA Title: "Hydrazide substrate safely shuts down disease activated protease to halt viral replication, cancerous cell division, and toxic protein generation"

Examiner: Mr. Brian J. Davis, Art Unit 1621

**Petition for Extension of Time**

Assistant Commissioner of Patents

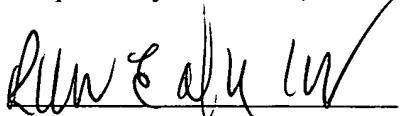

Alexander, Va. 22313-1450

Sir:

The pro se applicant is not familiar with the proper preparation and prosecution of the patent application but desires to avoid abandonment of the application, and herewith petitions for an extension of time. A \$55 dollar check is included which is believed proper for the one month extension being requested. The applicant's intention is for purposes to avoid abandonment, and prepare and file a regular continuing application where new claims and amendments to the specification can be provided. Your understanding and help toward this aim is very much appreciated.

**This petition is for a one month extension and \$55 dollar payment is enclosed as believed is correct for a small entity type extension.**

Respectfully submitted,

  
Reuben E. De Loach  
applicant, pro se  
(817) 560-2827
